From time to time, Shunyata Research may offer product upgrades that will require the return of the product to the factory. Please contact Customer Service for further information and instructions regarding specific product upgrades. Shipping (both ways) for all factory-performed upgrades is the responsibility of the owner.

You must obtain an RMA before returning any product to the factory.

Advertising

Ordering Information

Speaker cables and interconnects are priced **per pair**. Power cables and digital cables are priced **per cable**.

All cables are priced at a standard length, as indicated per model. Additional length may be added. Note that the pricing for additional length is per 0.25 meter. Cable lengths shorter than the listed standard length are priced the same as the base length cables.

When ordering speaker cables:

Speaker cable terminations must be selected for each speaker cable order. Two terminations are required: one for the amplifier end and one for the speaker end. For biwire speaker cables, three terminations are required: one for the amplifier end and two for the speaker end. Please make certain to specify all terminations to avoid any delays to your order.

When ordering phono cables:

Shunyata Research phono cables include a pair of single-ended (RCA) cables with a matched **ground cable** with multi-spade terminations. When ordering phono cables, please also indicate terminations for both the source and destination ends of the ground cable. Termination options include: combo spade (brass), small spade (copper), medium spade (copper), spade (gold; additional cost on Venom), and banana (gold; additional cost on Venom).

Please note when ordering **USB cables**: the minimum length is 1.5 meters, and the maximum length is 5 meters.

When ordering power distributors:

Shunyata Research power distributors do NOT ship with a power cable (except where noted). All power distributors, with the exception of the Gemini Model-4, have a C20 power inlet. Please order a C19 power cable for each power distributor.

Power Cable Connectors

Shunyata Research offers a number of terminations for power cables; please see the description and part number under each model listing for available terminations. Shunyata also manufactures a variety of adapters to convert ONE power cable to another connector type. Adapters are listed under 'Accessories' on page 19.
